VOL 2

Mansoor Ahmed HASSAN
Doctor of Philosophy

THE UNIVERSITY OF ASTON IN BIRMINGHAM

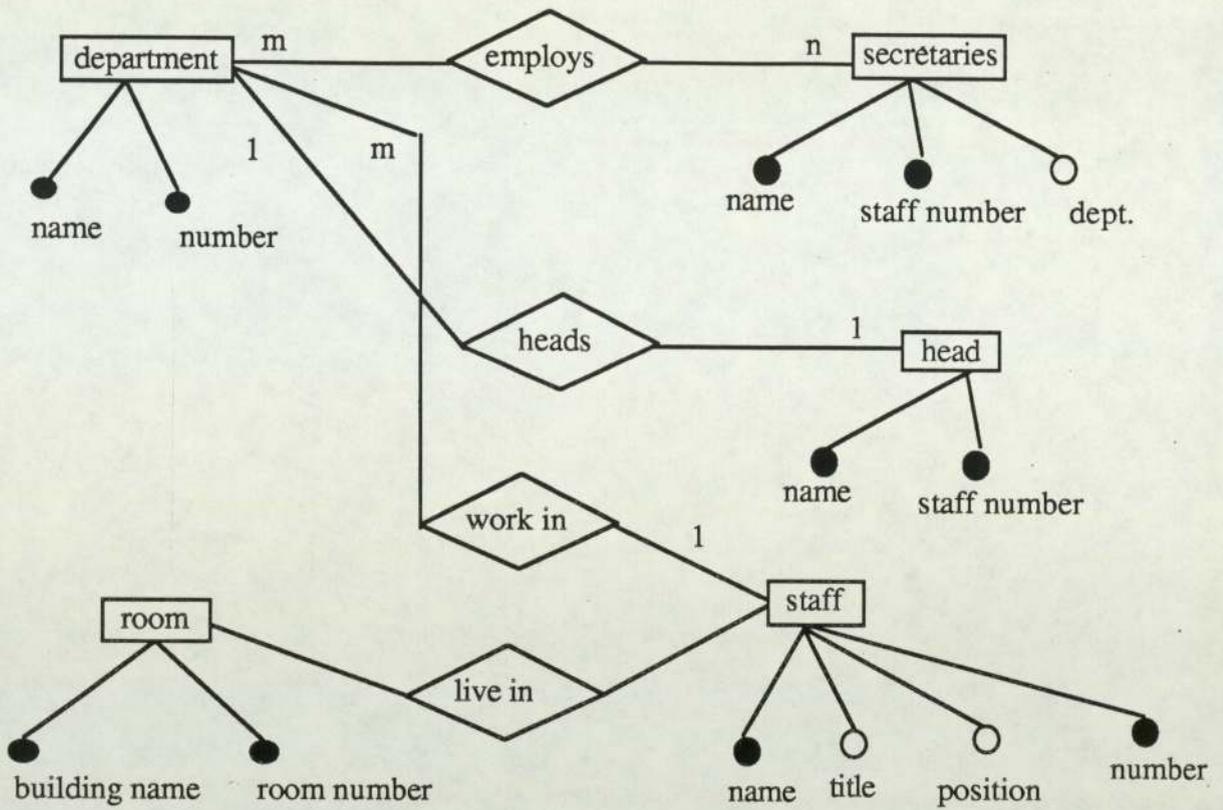

June 1989

"This copy of the thesis has been supplied on condition that anyone who consults it is understood to recognise that its copyright rests with its author and that no quotation from the thesis and no information derived from it may be published without the author's prior, written consent".

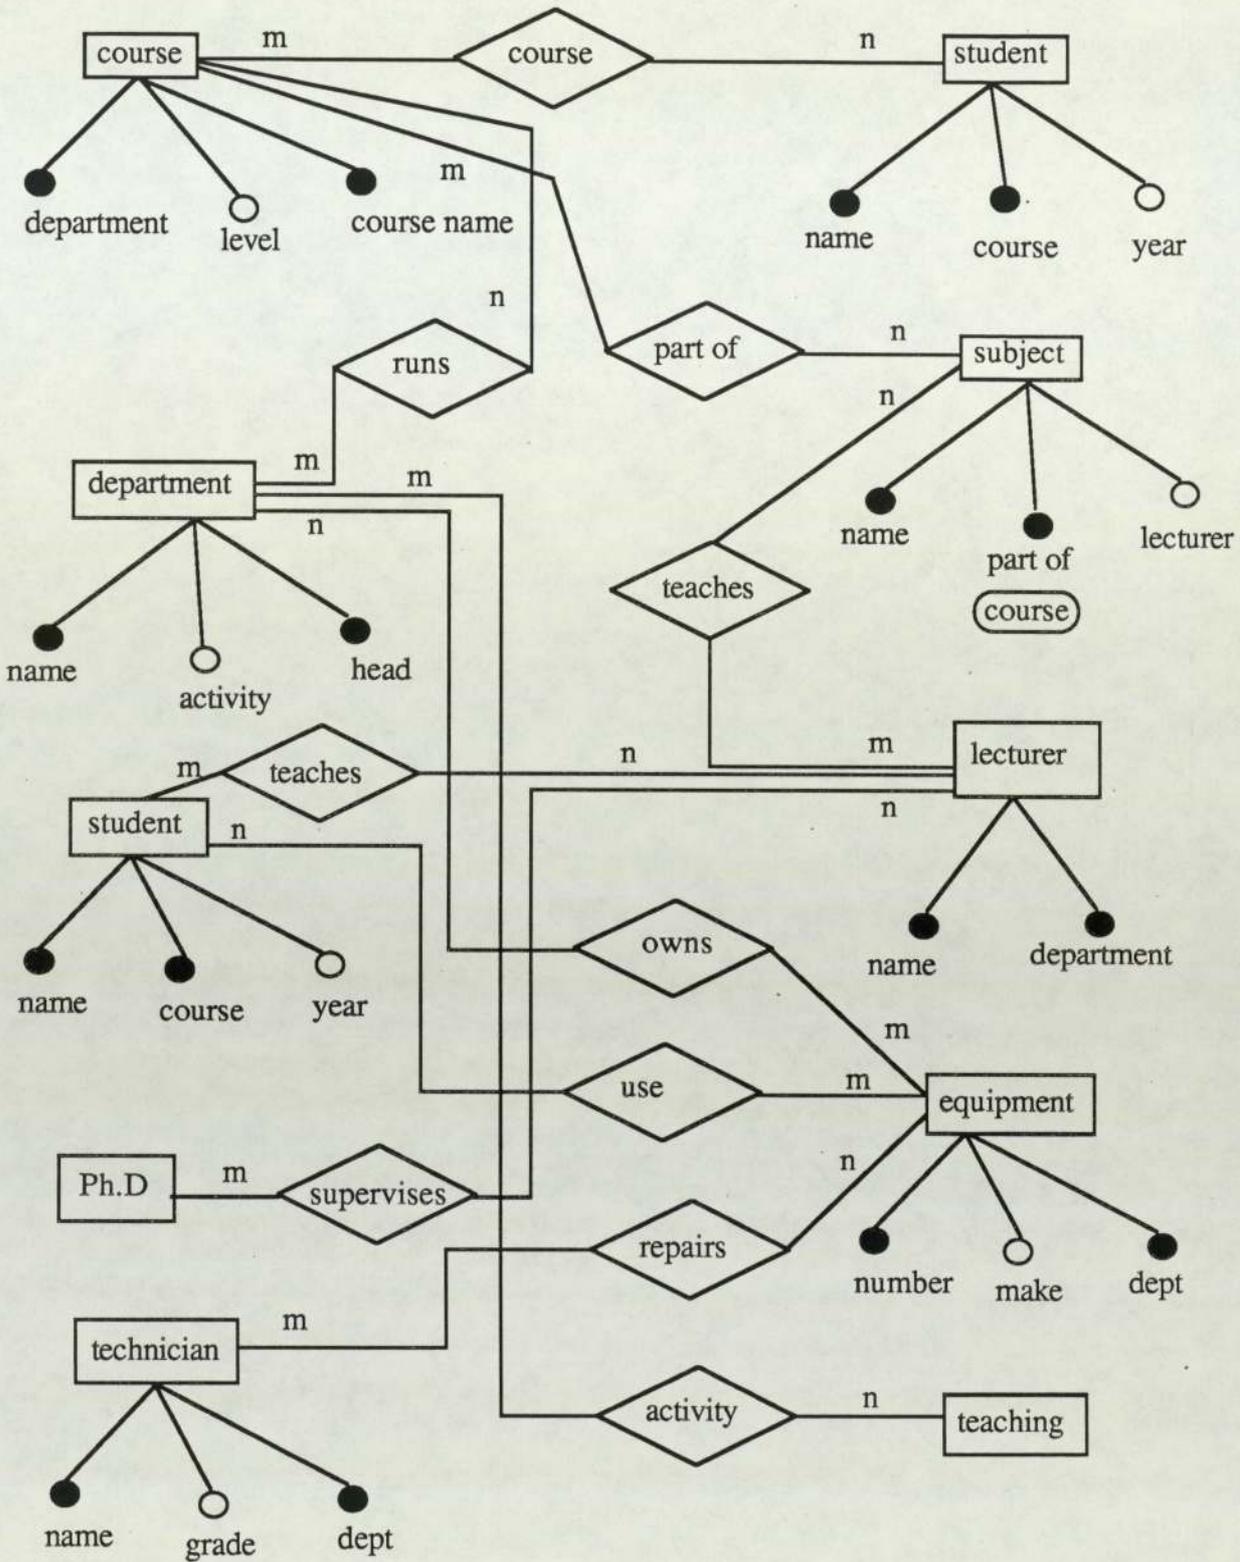

Table of contents (Vol. 2)

Appendix	A	views in ERM form	3
Appendix	B	views in VDL form	19
Appendix	C	GCS before COT analysis in VDL from	42
Appendix	D	GCS before COT analysis in ERM from	58
Appendix	E	GCS after COT analysis by VI in ERM from	62
Appendix	F	Test run	66
Appendix	G	SLF results of the weigh and add method	77
Appendix	H	SLF results of the weigh and multiply method	110
Appendix	I	GCS after manual and VI COT analysis	143
Appendix	J	Program listings	147

CROSS OBJECT TYPE CONFLICTS ANALYSIS

The attribute activity which belonged to entity department
 existed as the relationship activity
 and the RELATIONSHIP activity involves the entity department

SOLUTION: The ATTRIBUTE activity was removed from the ENTITY department by
 the view integrator

ATTRIBUTE AS RELATIONSHIP CROSS OBJECT TYPE CONFLICT

The attribute course of entity students
 exists as a relationship of the same name as the attribute
 AND the relationship course does not involve the entity
 students

The solution to such a conflict cannot be taken by VI
 Therefore Please choose one of the following :

1. Remove attribute from entity students
2. Change attribute name
3. Change relationship name
4. Leave attribute and relationship names as they are

ENTER your order by typing the appropriate number

|: 2.

Enter the new attribute name: 'course name'.

ATTRIBUTE AS RELATIONSHIP CROSS OBJECT TYPE CONFLICT

The attribute location of entity conference
 exists as a relationship of the same name
 AND the relationship location does not involve the entity
 conference

The solution to such a conflict cannot be taken by VI
 Therefore Please choose one of the following :

1. Remove attribute from entity conference
2. Change attribute name
3. Change relationship name
4. Leave attribute and relationship names as they are

ENTER your order by typing the appropriate number

|: 4.

ATTRIBUTE AS RELATIONSHIP CROSS OBJECT TYPE CONFLICT

The attribute course of entity subject exists as a relationship of the same name as the attribute AND the relationship concerned does not involve the entity subject of the attribute concerned

The solution to such a conflict cannot be taken by VIM

Therefore Please choose one of the following :

1. Remove attribute from entity subject
2. Change attribute name
3. Change relationship name
4. Leave attribute and relationship names as they are

ENTER your order by typing the appropriate number

|: 2.

Enter the new attribute name: 'course name'.

ATTRIBUTE AS RELATIONSHIP CROSS OBJECT TYPE CONFLICT

The attribute course of entity exam exists as a relationship of the same name as the attribute AND the relationship concerned does not involve the entity exam of the attribute concerned

The solution to such a conflict cannot be taken by VIM

Therefore Please choose one of the following :

1. Remove attribute from entity exam
2. Change attribute name
3. Change relationship name
4. Leave attribute and relationship names as they are

ENTER your order by typing the appropriate number

|: 2.

Enter the new attribute name: 'course name'.

ATTRIBUTE AS RELATIONSHIP CROSS OBJECT TYPE CONFLICT

The attribute course of entity form exists as a relationship of the same name as the attribute AND the relationship concerned does not involve the entity form of the attribute concerned

The solution to such a conflict cannot be taken by VIM
Therefore Please choose one of the following :

1. Remove attribute from entity form
2. Change attribute name
3. Change relationship name
4. Leave attribute and relationship names as they are

ENTER your order by typing the appropriate number

|: 2.

Enter the new attribute name: 'course name'.

ATTRIBUTE AS RELATIONSHIP CROSS OBJECT TYPE CONFLICT

The attribute location of entity technical report exists as a relationship of the same name as the attribute AND the relationship concerned does not involve the entity technical report of the attribute concerned

The solution to such a conflict cannot be taken by VI
Therefore Please choose one of the following :

1. Remove attribute from entity technical report
2. Change attribute name
3. Change relationship name
4. Leave attribute and relationship names as they are

ENTER your order by typing the appropriate number

|: 4.

ATTRIBUTE AS RELATIONSHIP CROSS OBJECT TYPE CONFLICT

The attribute owner of entity document exists as a relationship of the same name as the attribute AND the relationship concerned does not involve the entity document of the attribute concerned

The solution to such a conflict cannot be taken by VI

Therefore Please choose one of the following :

1. Remove attribute from entity document
2. Change attribute name
3. Change relationship name
4. Leave attribute and relationship names as they are

ENTER your order by typing the appropriate number

|: 2.

Enter the new attribute name: writer.

ATTRIBUTE AS RELATIONSHIP CROSS OBJECT TYPE CONFLICT

The attribute course of entity project exists as a relationship of the same name as the attribute AND the relationship concerned does not involve the entity project of the attribute concerned

The solution to such a conflict cannot be taken by VI

Therefore Please choose one of following :

1. Remove attribute from entity project
2. Change attribute name
3. Change relationship name
4. Leave attribute and relationship names as they are

ENTER your order by typing the appropriate number

|: 2.

Enter the new attribute name: 'course name'.

 ATTRIBUTE AS RELATIONSHIP CROSS OBJECT TYPE CONFLICT

The attribute location of entity seminar exists as a relationship of the same name as the attribute AND the relationship concerned does not involve the entity seminar of the attribute concerned

The solution to such a conflict cannot be taken by VI
Therefore Please choose one of following :

1. Remove attribute from entity seminar
2. Change attribute name
3. Change relationship name
4. Leave attribute and relationship names as they are

ENTER your order by typing the appropriate number

|: 2.

Enter the new attribute name: place.

 ATTRIBUTE VALUE AS ENTITY_RELATIONSHIP

The attribute: part of of entity: subject
has a value: course
and exists an an entity relationship

The value: course was removed from attribute: part of
Because the attribute part of has no other values,
it was removed from entity subject

 ENTITY AS ATTRIBUTE CROSS OBJECT TYPE CONFLICT

The attribute department of entity course
exists as the entity department

BUT: The entity course of attribute department
is connected to entity department
by relationship(s):

CHOOSE any of the following:

1. DELETE the attribute department
2. CHANGE the name of the attribute department
3. CHANGE the name of the entity department
4. CHANGE the name of the entity course
5. Accept the situation
6. CREATE a relationship between course and department

|:

|: 5.5.

YOU HAVE MADE THE WRONG CHOICE PLEASE TRY AGAIN

 ENTITY ATTRIBUTE CROSS TYPE CONFLICT

The attribute department of entity course
exists as the entity department

BUT: The entity course of attribute department
is connected to entity department
by relationship(s):

CHOOSE any of the following:

1. DELETE the attribute department
2. CHANGE the name of the attribute department
3. CHANGE the name of the entity department
4. CHANGE the name of the entity course
5. Accept the situation
6. CREATE a relationship between course and department

|: 5.

 ENTITY ATTRIBUTE CROSS TYPE DEFINITION

The attribute course of entity student
exists as the entity course

BUT: The entity student of attribute course
is NOT connected to entity course
by ANY relationship(s):

CHOOSE any of the following:

1. DELETE the attribute course
2. CHANGE the name of the attribute course
3. CHANGE the name of the entity course
4. CHANGE the name of the entity student
5. Accept the situation
6. CREATE a relationship between student and course

|: 2.

The name of the attribute you wish to change is course
of entity student

Enter the new attribute name to replace the old name: 'course name'.

ENTITY ATTRIBUTE CROSS TYPE DEFINITION

The attribute lecturer of entity subject
exists as the entity lecturer

BUT: The entity subject of attribute lecturer
is NOT connected to entity lecturer
by ANY relationship(s):

CHOOSE any of the following:

1. DELETE the attribute lecturer
2. CHANGE the name of the attribute lecturer
3. CHANGE the name of the entity lecturer
4. CHANGE the name of the entity subject
5. Accept the situation
6. CREATE a relationship between subject and lecturer

|: 5.

ENTITY ATTRIBUTE CROSS TYPE DEFINITION

The attribute head of entity department
exists as the entity head

BUT: The entity department of attribute head
is connected to entity head
by relationship(s):

CHOOSE any of the following:

1. DELETE the attribute head
2. CHANGE the name of the attribute head
3. CHANGE the name of the entity head
4. CHANGE the name of the entity department
5. Accept the situation
6. CREATE a relationship between department and head

|: 1.

 ENTITY ATTRIBUTE CROSS TYPE DEFINITION

The attribute supervisor of entity student
exists as the entity supervisor

BUT: The entity student of attribute supervisor
is connected to entity supervisor
by relationship(s):

CHOOSE any of the following:

1. DELETE the attribute supervisor
2. CHANGE the name of the attribute supervisor
3. CHANGE the name of the entity supervisor
4. CHANGE the name of the entity student
5. Accept the situation
6. CREATE a relationship between student and supervisor

|: 2.

The name of the attribute you wish to change is supervisor
of entity student

Enter the new attribute name to replace the old name: 'supervisor name'.

 ENTITY RELATIONSHIP CROSS TYPE DEFINITION

The entity course exists as the relationship course
The entity course is involved in relationship course

This could mean any of three things

1. The entity is wrongly named
2. The relationship is wrongly named

CHOOSE any of the following:

1. CHANGE the name of the entity course
2. CHANGE the name of the relationship course
3. Accept the situation

|: 2.

Enter the new relationship name to replace the old name: courses.
