

LIST OF CONTENTS

Section IV: Morphology control in blends and organic-inorganic hybrids

Section IV (a)

- 30) Herpels J. and Mascia L., Effects of Styrene-Acrylonitrile ratio on the toughness of Polycarbonate/ABS blends, *European. Polym.Journ.*, 26, (1990), 997-1003.
- 31) Mascia L., Moggi A. and Bellahdeb F., Co-ionomers as Compatibilisers for Polymer Alloys, *Journal of Materials Science Letters*, 11, (1992), 1441-1442.
- 32) Mascia L. and Moggi A., Co-ionomeric mixtures of polyhydroxyethers and ethylene methacrylic acid copolymers: Part 1, Effects of cation concentration and ABA oligomeric miscibilisers on morphology and properties. *J. Polym. Sci.: Polymer Physics Edition*, 31 (10), (1993), 1299-1309.
- 33) Mascia L. and Moggi A., Ibid : Part 2, Compatibilisers for blends of polybutylene terephthalate and ethylene butyl acrylate copolymers. *J. Polym. Sci.: Polymer Physics Edition*, 31 (10), (1993), 1309-1317.
- 34) Mascia L. and Bellahdeb F., Graft copolymers and interpolymer ionomeric associations from mixtures of Phenoxy with anhydride and acid functionalised Polyolefins: Part 1, Reactants, Composition and morphology, *Advances in Polymer Technology*, 13(1), (1994), 37-47.
- 35) Mascia L. and Bellahdeb F., Compatibilisation of HDPE and PET with graft copolymers and ionomeric mixtures of acid functionalised ethylene copolymers and phenoxy : Part 2, Effects of polymer composition on morphology, melt viscosity and mechanical properties, *Advances in Polymer Technology*, 13(2), (1994), 99-109.
- 36) Mascia L., Hitchcock G.R. and Valenza A., Effects of sodium concentration on the morphology and rheological behaviour of alkoxide-carboxylate co-ionomeric mixtures of phenoxy and ethylene terpolymers, *Colloid and Polymer Science*, 272, (1994), 168-174.
- 37) Mascia L. and Valenza A., Reactive Dual-Component Compatibilizers for Polycarbonate / High Density Polyethylene Blends, *Advances in Polymer Technology*, 14(4), (1995), 327-335.
- 38) Valenza A., Carianni G. and Mascia L., Radiation Grafting Functionalization of Poly(vinylidene fluoride) to Compatibilize its Blends with Polyolefin Ionomers, *Polymer Engineering and Science*, 38, (1998), 452- 60.
- 39) Mascia L., Pak S.-H. and Caporiccio G., Radiation Assisted Compatibilisation of Blends of Vinylidene Fluoride Polymers with Fluorosilicone Elastomers by means of Cross-Linking Agents, *Polymer International*, 35, (1994), 75-82.
- 40) Mascia L., Pak S.-H. and Caporiccio G., Properties Enhancement of Fluorosilicone Elastomers with Compatibilised Vinylidene Fluoride Polymers, *European Polymer Journal*, 31(5), (1995), 459-465

- 41) Mascia L. and Hashim K., Carboxylic Acid Functionalisation of Nylon 6 by Radiation Grafting and Conversion to Zinc Salts: Effects on Physical Properties, *Colloid and Polymer Science*, 275 (1997), 689-697
- 42) Mascia L and Hashim K, Compatibilization of Poly(vinylidene fluoride) / Nylon 6 Blends by Carboxylic Acid Functionalization and Metal Salt Formation: Part 1. Grafting Reactions and Morphology, *Journal of Applied Polymer Science*, 66, (1997), 1911-1923
- 43) Mascia L. and Hashim K. , Compatibilization of Poly(vinylidene fluoride) / Nylon 6 Blends by Carboxylic acid Functionalization and Metal Salt Formation: Part 2, Effects on Physical Properties and Rheological Behaviour, *Polymer*, 39, (1998), 369-376.
- 44) Mascia L. and Fekkai Z., Shrinkage phenomena in biaxially drawn transparent polyethylene terephthalate blends, *Polymer Networks and Blends*, 2 (4), (1992), 197-207.
- 45) Mascia L. and Martin L.H., Blends of Aromatic Polysulphones and Alkene Terephthalate Polymers: Compatibilisation with Polyhydroxyether of Bisphenol-A, *High Performance Polymers*, 8, (1996), 119-131.
- 46) Adewole A.A., DeNicola A., Gogos C.G. and Mascia L., Compatibilization of Polypropylene-Polystyrene blends: Part1, Effects of Mixing Intensity on Morphology and Rheological Properties, *Plastics, Rubber and Composites*, 29, (2000), 70-79
- 47) Adewole A.A., DeNicola A., Gogos C.G. and Mascia L., Compatibilization of Polypropylene-Polystyrene blends:, *Advances in Polymer Technology*, 19, (2000), 180 -193
- 48). Mascia L. and Ophir A., Toughness Enhancement of Poly(ethylene terephthalate) with Functionalised Ultrahigh Molecular Weight Polyethylene, *Journal of Applied Polymer Science*, 81 (2001) 2972 - 2986

Section IV (b)

- 49) Frigione M.E. , Mascia L. and Acierno D., Toughness enhancement of Epoxy Resins by means of Oligomeric and Polymeric Modifiers, *European Polymer Journal* , 31(11), (1995), 3649-3659
- 50) Mascia L., F. Zitouni and C. Tonelli, Miscibilisation of telechelic fluoroalkene oxide oligomers in epoxy resins and effects on morphology and physical properties, *Journal of Applied Polymer Science*, 51, (1994), 905-923.
- 51) Mascia L., Zitouni F. and Tonelli C., Morphology and Mechanical Properties of Epoxy Resins containing Functionalised Perfluoro Oligomers , *Polymer Engineering and Science*, 35 (13), (1995), 1069-1076
- 52) Frigione M., Acierno D. and Mascia L., Miscibilization of Low Molecular Weight Functionalized Polyethylenes in Epoxy Resins, *Journal of Applied Polymer Science* 73, (1999), 1457 - 1470

53)) Frigione M., Acierno D. and Mascia L., Morphological Features and Physical Properties of Epoxy Resins Containing Miscibilized Low Molecular Weight Polyethylene Modifiers, *Advances in Polymer Technology*, 18, (1999), 237-254

54) Martuscelli E., Musto P., Ragosta G., Riva F. and Mascia L., Toughening of Tetrafunctional Epoxy Resins with Telechelic Extended Perfluoroligomers, *Journal of Materials Science*, 35 (2000) 1-8

Section IV(c)

55) Mascia L., Current Developments in Organic-Inorganic Hybrid Materials: Ceramers, *Trends in Polymer Science*, 3(2), (1995), 61-66.

56) Mascia L. and Kioul A., Polyimide -Silica Hybrid Materials by Sol-Gel Processing, *Journal of Materials Science Letters*, 13, (1994), 641-643.

57) Kioul A. and Mascia L., Compatibility of Polyimide-Silica Hybrids induced by Alkoxysilane Coupling Agents, *Journal of Non-Crystalline Solids*, 175, (1994), 169-186

58) Mascia L. and Kioul A., Effects of the Siloxane Structure and Morphology on the Properties for Polyimide-Silica Hybrids, *Polymer*, 36 (19), (1995), 3649-3659

59) Mascia L., Zhang Z. and Shaw S.J., Carbon Fibres Composites Based on Polyimide/Silica Ceramers: Aspects of Structure-Properties Relationship. *Composites Part A*, 27A, (1996), 1211-1221.

60) Mascia L., Materiali Ibridi Organici-Inorganici (Ceramers o Nanocompositi): Aspetti Strutturali e Proprieta', *La Chimica e l'Industria*, 80, (1998,) 623-628 (invited paper)

61) Mascia L. and Tang T., Polyperfluoroether Silica-Hybrids, *Polymer*, 39, (1998), 3045-3057

62) Mascia L. and Tang T., Curing and morphology of Epoxy Resin-Silica Hybrids *Journal of Materials Chemistry*, 8, (1998), 2417-2421

63) Mascia L. and Tang T., Ceramers based on Crosslinked Epoxy Resins-Silica Hybrids: Low Surface Energy Systems, *Journal of Sol-Gel Science and Technology*, 13, (1998), 405-408

64) Xenopoulos C., Mascia L. and Shaw S.J., Variables analysis in the gelation of alkoxysilane solutions for the production of polyimide-silica hybrids, *Materials Science and Engineering*, C6, (1998), 99-114 (invited paper)

65) Menoyo J.D.C., Mascia L. and Shaw S.J., Compatibilization mechanism of polyimide-silica hybrids with organofunctional trialkoxysilanes, *MRS Spring Meeting, S. Francisco* 13 - 17 April 1998 (invited paper)

- 66) Mascia L, Xenopoulos C. and Shaw S.J., Polyimide-Silica Hybrids based on Polyamic Acid and an Acetylene Terminated Isoimide Oligomer, *International Conference on Organic-Inorganic Hybrids, University of Surrey, 12 - 14 June 2000 (invited paper)*
- 67) C. Xenopoulos, L. Mascia and S. J. Shaw, Optimisation of Morphology of Polyimide-Silica Hybrids in the Production of Matrices for Carbon Fibre Composites, *High Performance Polymers*, 13, (2001), 1 - 17
